

# Managed Print Services

Improve printing efficiency

# Take Control of your Print Environment and save up to 30% on overall print cost

ARC MPS....

- Access to the latest printing and scanning technology regardless of the brand. You will get the best, most robust line of print devices around, hand-picked for your specific use
- Streamline your document workflow and print management with proprietary software allowing you to recover cost through clients' bill back and reduce print usage and volume
- Eliminate IT tickets with quality technical support including proactive and reliable service and automatic consumable replenishment

Devices + software + Service = MPS

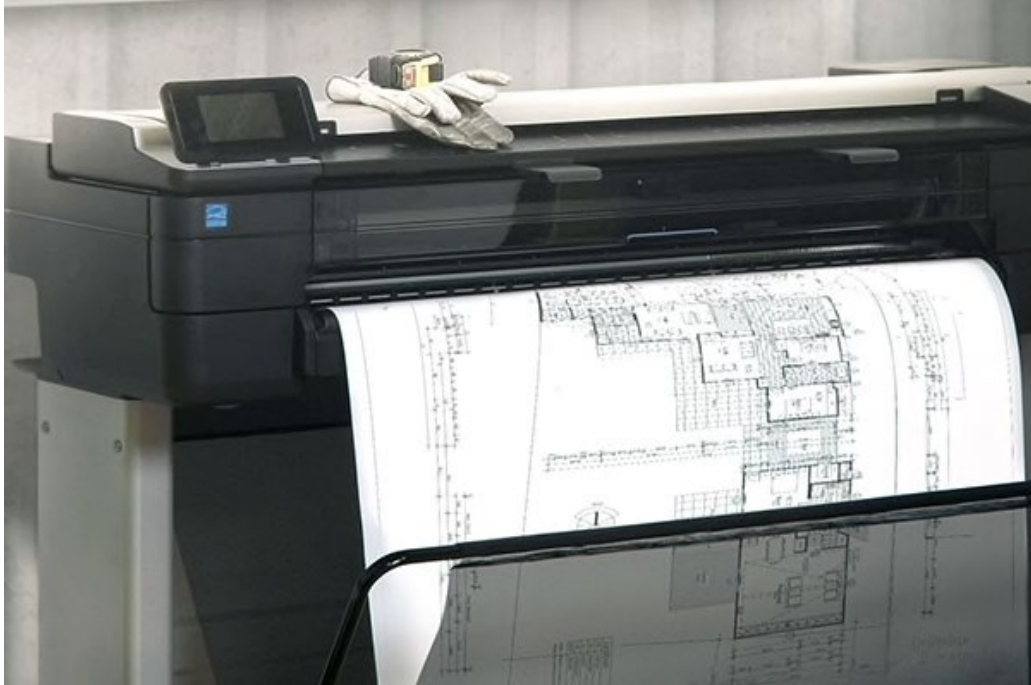

Save money, increase employees productivity, and focus on core business thanks to ARC Managed Print Services program.

The program is a flexible and scalable solution so you only pay for what you use. It also helps you control and predict costs.

ARC MPS contributes to reaching goals of green initiatives by reducing hardware and wasteful printing around your organization.

ARC MPS covers your on-site small and large formats and gives you access to 160+ reprography locations nationwide.

Latest technology in printing and imaging equipment for your business.

Customized your equipment fleet with a wide range of devices regardless of manufacturers to meet your exact needs and requirements:

- Multifunction copiers
- Plotters
- Desktop printers
- Large format printers
- Digital presses
- 3D printers
- Small format
- Scanners

Bring your projects  
to life with the HP  
small format MFPs

With the latest printers from HP, you get the print flexibility you need to produce everything from everyday correspondence and reports to large format spreadsheets and high-quality marketing materials.

- Powerful security
- More vibrant colors
- Unmatched speed
- More accurate reporting

A man in a grey cardigan and striped shirt stands in a warehouse-like space, looking at a tablet. To his left is a large white HP multifunction printer with a tablet on its control panel. In the background, there are large windows with a grid pattern and stacks of HP printer boxes. To the right, a smaller white HP printer sits on a table.

## Transform your printing experience with The Next Generation of Printers

Enhance project communication, drive efficiency and improve accuracy with easy-to-understand documents thanks to vibrant colors.

Stay protected with secured tools for your business. HP has the world's most secure printers, featuring self-healing embedded security features.
